Upcoming Events

Technology is advancing and cybersecurity is a growing concern. With the increasing use of AI phishing scams are getting ever more difficult to spot. The good news?

We, along with the Cyber and Fraud Centre Scotland and the Inspirable are delivering Cyber Resilience workshops online aimed for individuals in rural communities and an in-person workshop at the Argyll SEN in Oban on the 5th of December focussing on individuals in third sector organisations that live in rural areas.

The free workshops delivered by our partners from Cyber and Fraud Centre Scotland include a Cyber Security Presentation covering topics such as How to spot a phishing email, top 5 scams to look out for and how to protect yourself against these threats as an individual or an organisation.

We will be there providing a free cyber security tool kit and one to one digital consultations.

We welcome everyone along to learn about all things Cyber Resilience. This is a wonderful opportunity to get together with rural communities and third sector organisations in those areas.
